

# *United States Army Logistics Transformation Agency*

## CLOE STRATEGY & IMPLEMENTATION

**Decision Briefing for  
G-4 Army  
18 Dec 2003**

**Materiel Logistics Division  
Logistics Transformation  
Agency  
(717) 770-7600**

# Purpose - Why We Are Here!

- Obtain G-4 Approval Of CLOE Implementation Strategy

- Review:

- Execution to Date
  - CLOE v1.0 - SCBT Systems Architecture
  - Enterprise Integration
  - Aviation
  - FCS
- G-4 Concerns
- Implementation Going Forward
- Governance
- Enforcement
- Recommendations

## CSA Focus Areas

- Current to Future Force
- Army Aviation
- The Network

## G-4 Focus

### Areas

- "Connect" Our Logisticians
- Modernize Theater Distribution
- Improve Force Reception
- Integrate the Supply Chain

*CLOE Operational Architecture:*

***Integrate & Upgrade Current Force  
Sustainment Capability***

***Lay The Groundwork For Future Force  
Interoperability***

# CLOE OA Development

**The CLOE OA Starts With the SBCT PoE Operational Architecture and Adds Scope Until It Encompasses All Commodity Areas and Force Generations**

CLOE Operational Architecture, X.0  
FCS and Other Future Force Elements

CLOE Operational Architecture, 3.0  
IC3 & Soldier Systems

CLOE Operational Architecture, 2.0  
Aviation & GCSS-A

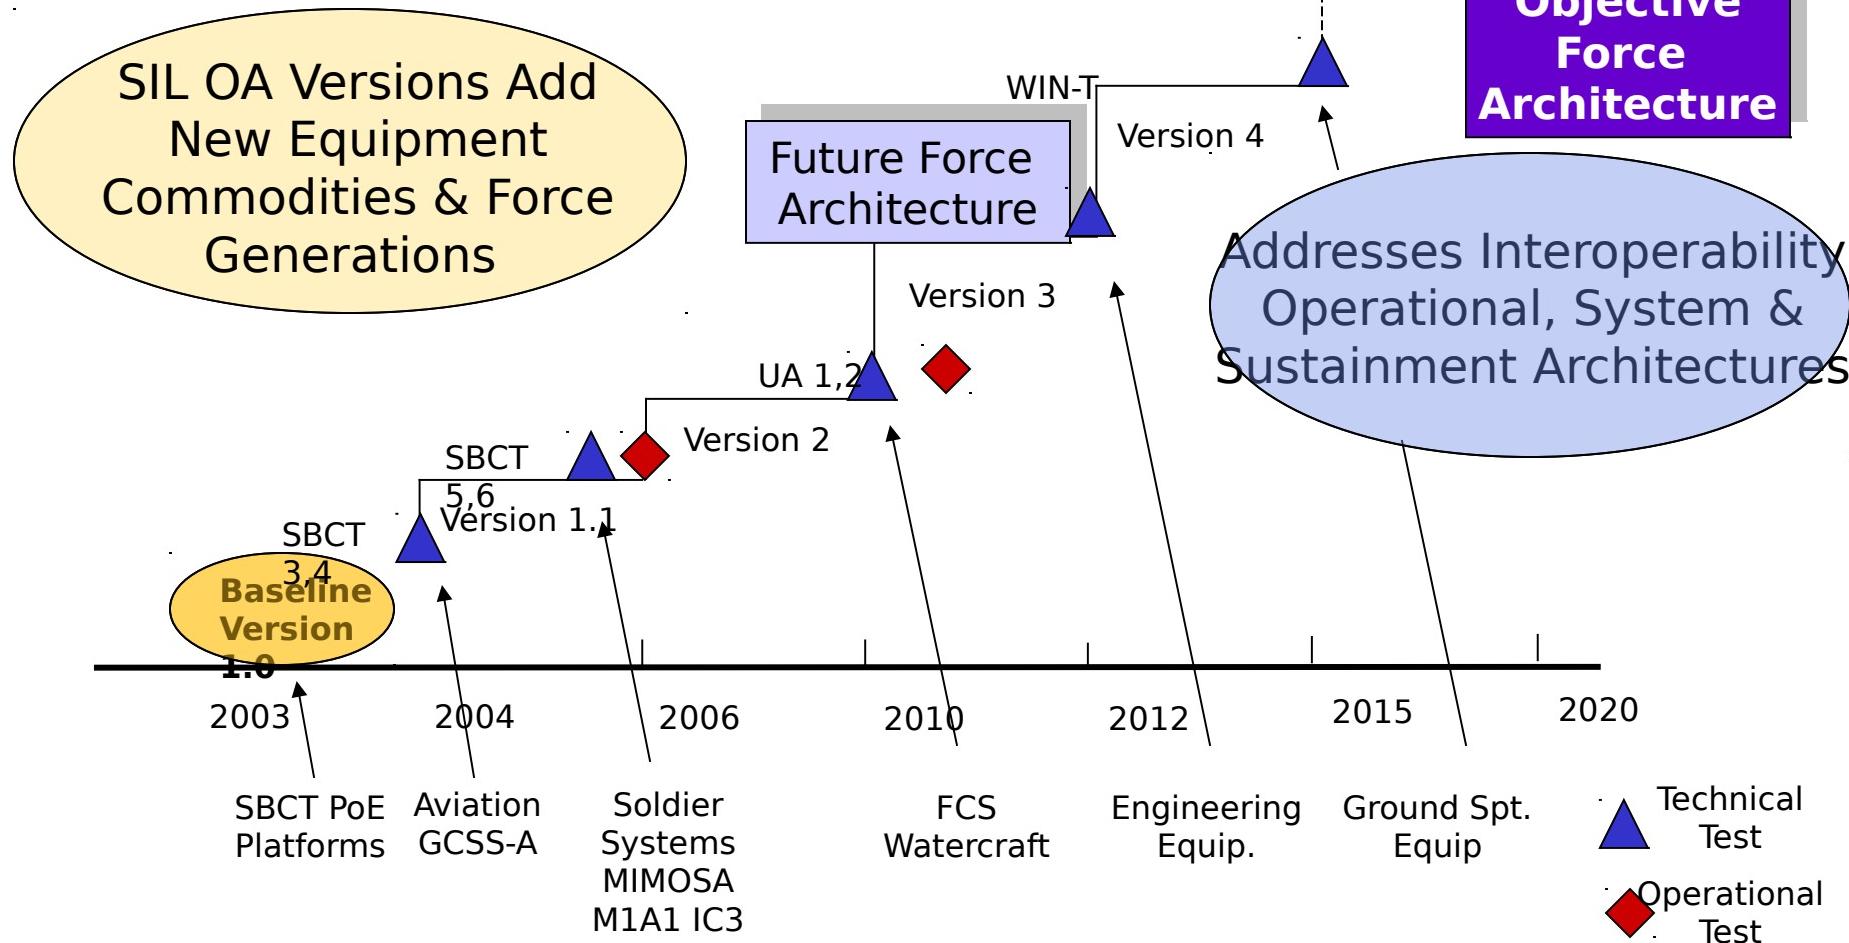

CLOE Operational Architecture, 1.0

SBCT OA

# CLOE Implementation Continuous Improvement Cycle\*

\*Notional Timelines and Sequence - Driven by Army Priorities and Technology

# CLOE Architecture v1.0 – Capabilities

## Available Fall 2004 with Existing Technologies

### **Network Enabled**

#### Networked BDE & Below operations

- Platform Networked – Sensors, enablers, middleware, protocols
- STAMIS Networked – CAISI, ULLS, SAMS, SARSS, PMM
- Communications Networked – FBCB2, MTS, WI-FI

### **Sensor Based & Linked**

#### Embedded sensor data focused on tactical level

- Integrated with mission planning
- Triggers sustainment and support operations
- Combined to provide operational status and logistics SA
- Future – Above tactical level

### **Distributed Processing**

#### Platform Data = Intelligence and Knowledge

- On-Platform Processing – Embedded Health Management System
- FBCB2 Processing – Fuel, Ammo diagnostics Status
- Off Platform Processing – PMM provide CBM & Fleet Status
- National Level data stored in PMM until Data Hub is in place

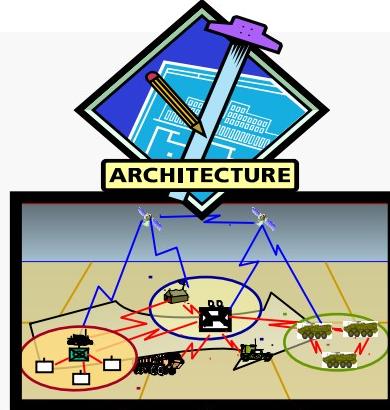

### **Reach as Required**

#### BSA Tactical Operations Center

- CDR's & Logisticians – Drill Down Capability
- CRT & FMC – Remote Diagnostic Capability
- Future – Linked to Data Hub, BCS3 and WIN-T

# CLOE Architecture v1.0 - Objectives & Ground Rules

## Objectives

Capabilities Based

Technology Enabled

Leverage existing current force platform sensor suites by developing a health management system and a common platform architecture that incorporates integrated enablers, COTS Technology, and Condition-Based Maintenance. Ensures doctrine and technology compatibility

Provide Logistics Situational Awareness to the combatant commander and connect the logisticians by providing a common logistics operational picture in near real time using existing communication devices and a drill down capability

## Ground Rules

Develop an operational architecture that at any point in time enables sustainment interoperability of a mixture of force generations on the battlefield

Implement anticipatory logistics actions and condition-based maintenance practices in a networked environment using existing STAMIS. CLOE is an evolving environment of systems integration and interoperability

# SBCT PoE Participants

- Army Organizations

- DCS G-4/Logistics Transformation Agency (Lead)
- DCS G-6, DCS G-3, DCS G-8
- CASCOM
- AMC
- PM Brigade Combat Team
- PM Force XXI Battle Command Brigade and Below
- PM Logistics Information Systems
- PM Movement Tracking System
- PM Heavy Tactical Vehicles
- PM Medium Tactical Vehicles
- PM Light Tactical Vehicles
- PM Test, Measurement, and Diagnostic Equipment
- Tank Automotive Command
- National Automotive Center

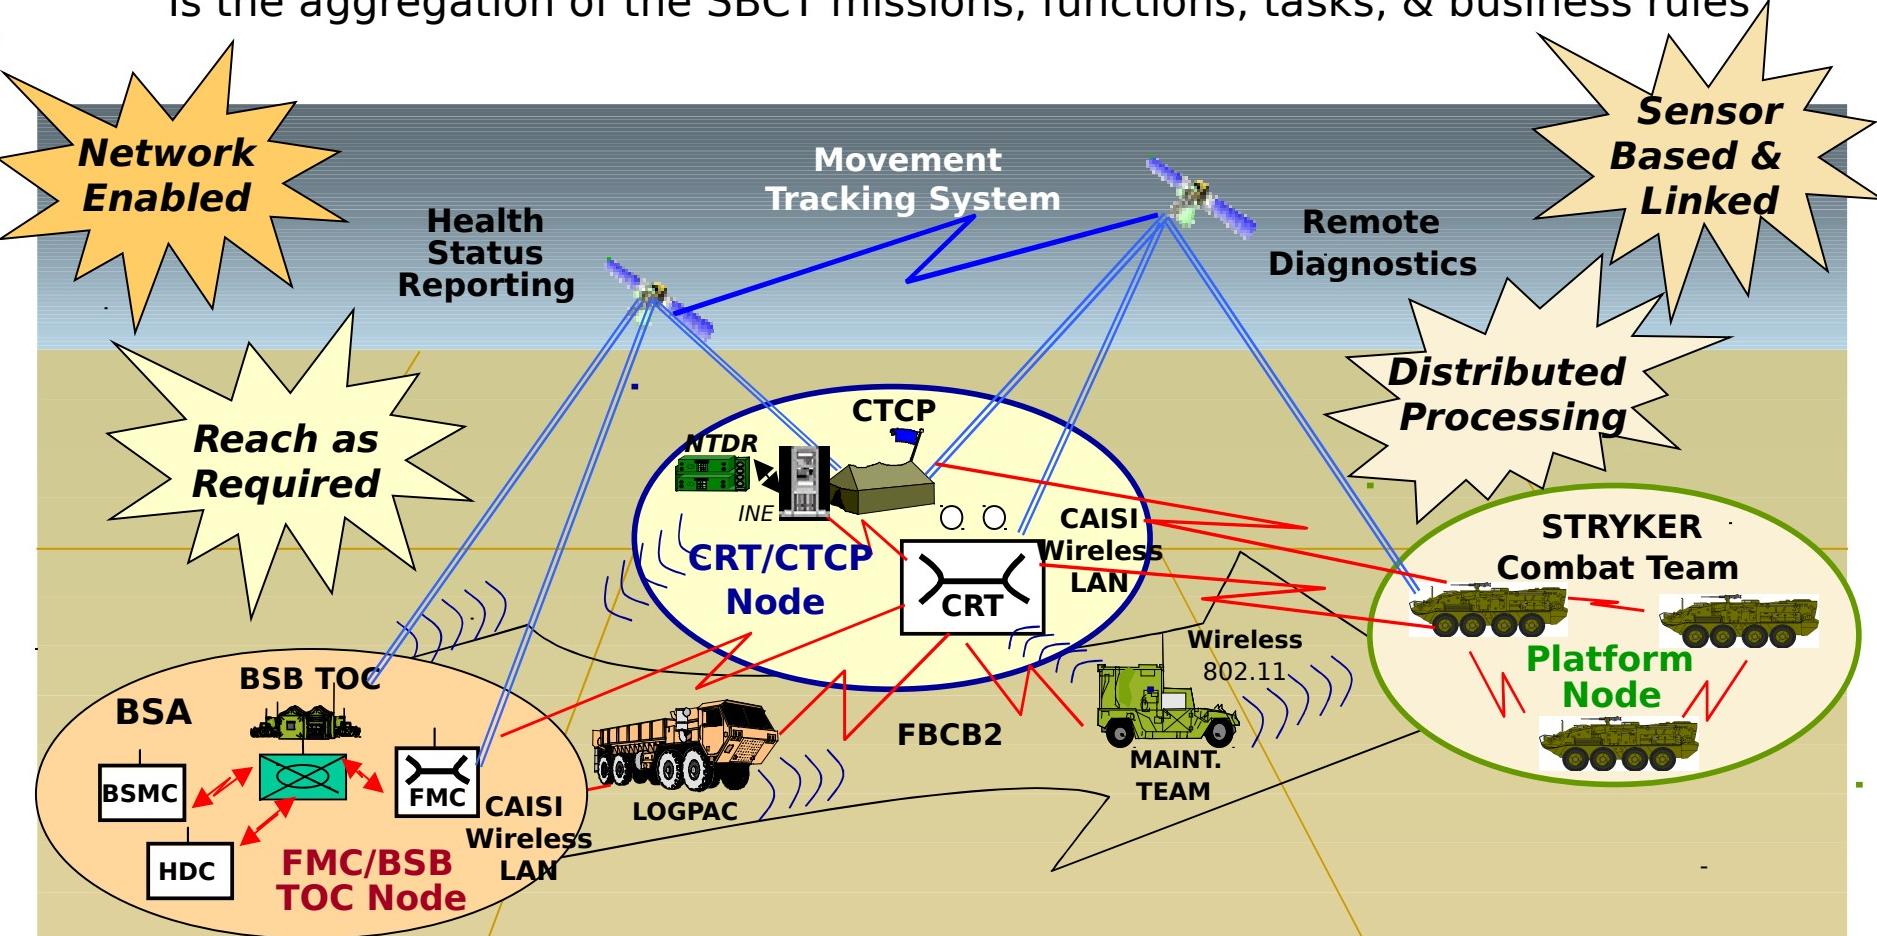

- Developers

- PNNL - LMI
- IBM - ComTech
- GDLS - ICRC
- Northrup Grumman - DriverTech
- SAIC - CSC
- O'Neil Associates

# SBCT POE Operational Architecture

Is the aggregation of the SBCT missions, functions, tasks, & business rules

SBCT  
O&O

FM 3-21  
& FM 4-97

**Focused on  
BDE & Below  
Operations**

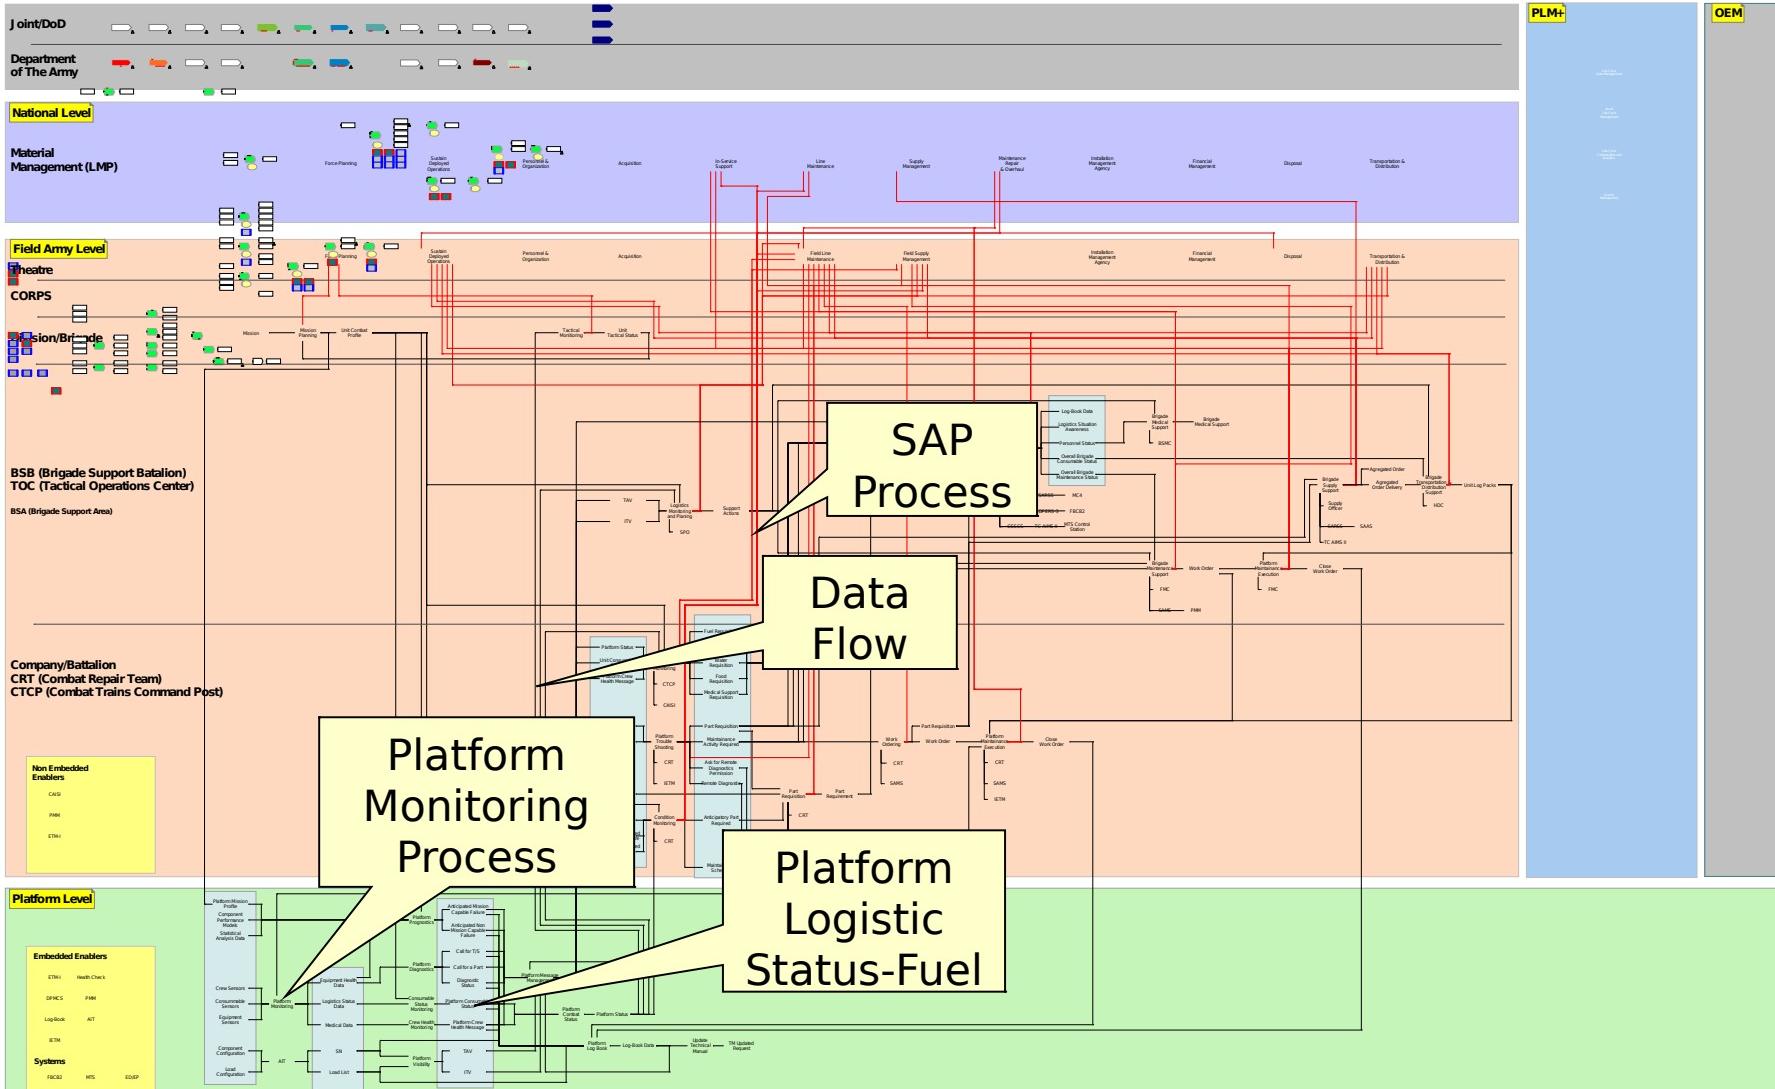

EDAPS  
Synchronized  
Concepts

SBCT  
MTO&E

# The CLOE-SALE Integration Model to Support GCSS-A Implementation

CLOE-SALE Integration Model

# Ongoing CLOE Coordination, Cont.

## ■ FCS Coordination

- Draft MOA For CLOE Assistance To FCS For Sustainment Interoperability Of FCS Complementary Programs
- Participating In FCS Sustainment And Log Products IPTs
- Jointly Identified And Mapped Milestone Schedules
- Programs For PS-MRS\* / LDSS\*\* And CLOE Milestone Plans
- Participating In PS-MRS And LDSS Technical Interchange Meetings

## ■ Aviation Coordination

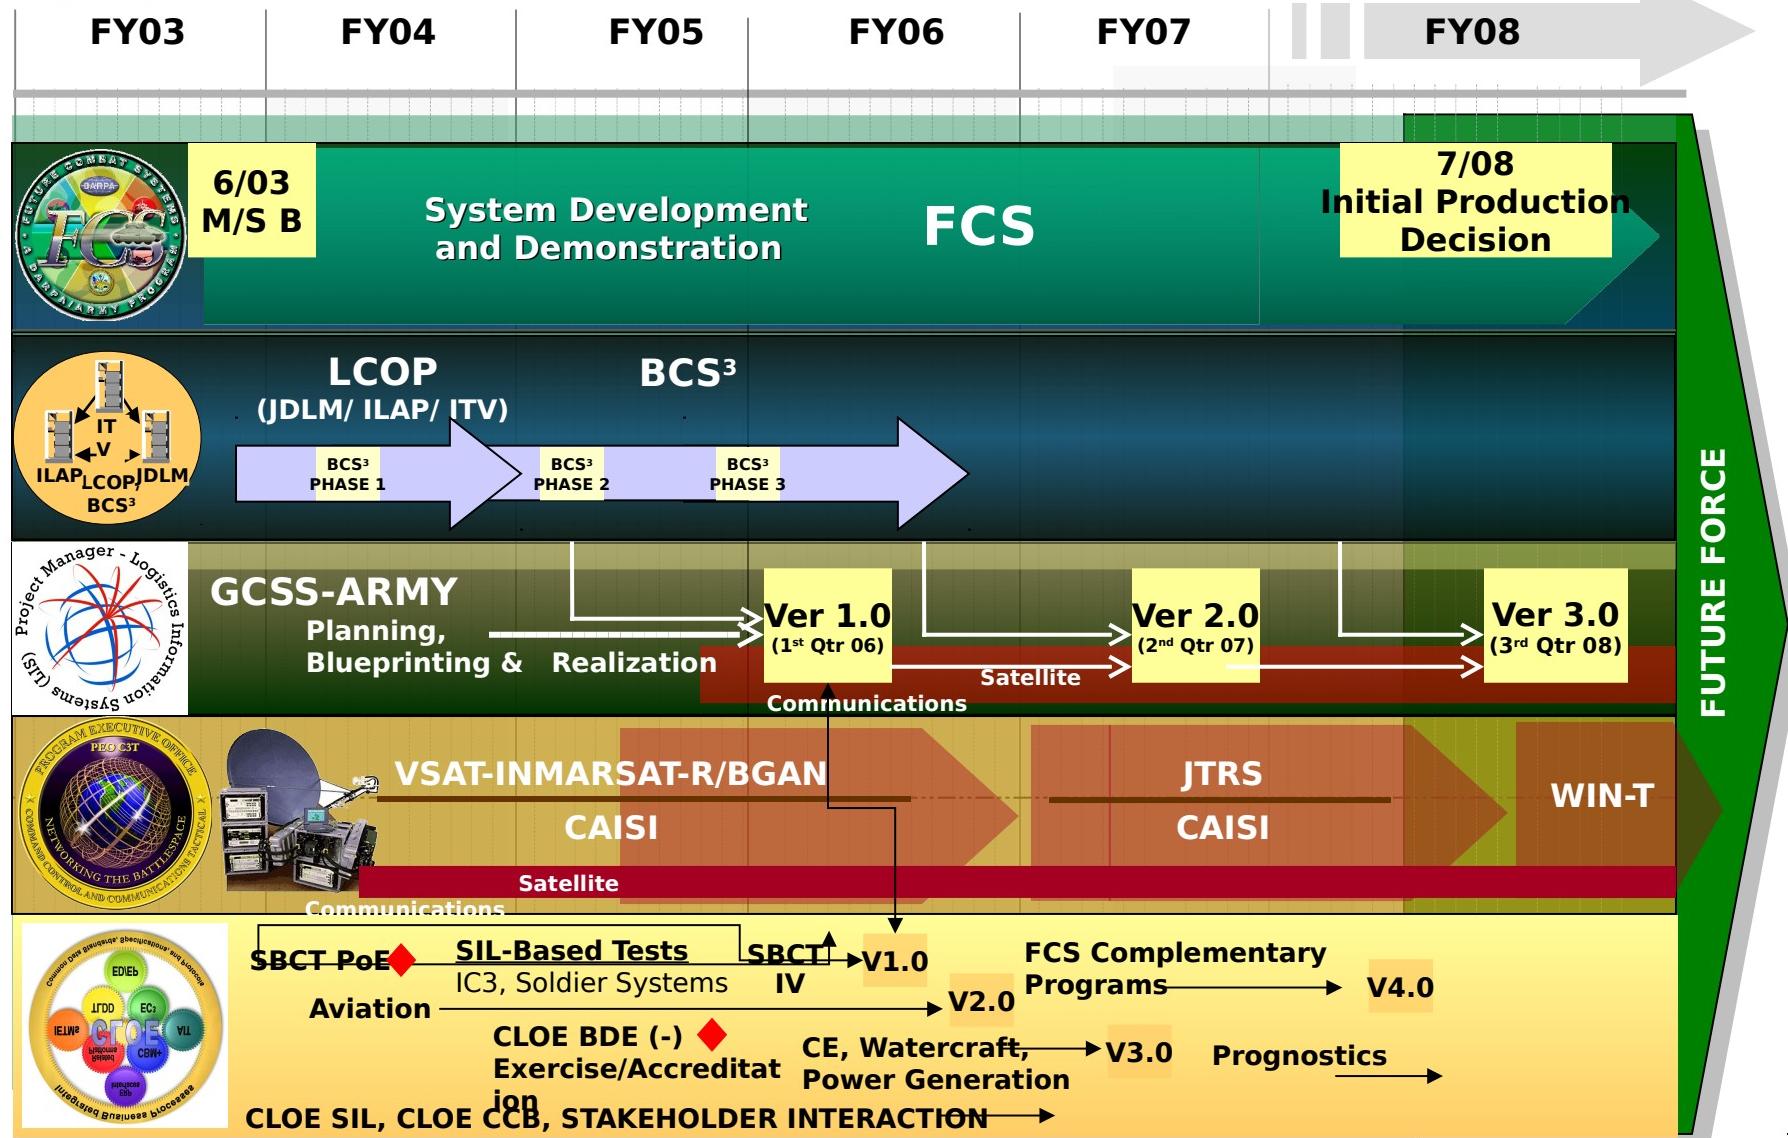

- Draft MOA For CLOE Assistance To PEO-Aviation In Developing A Common Tactical Aviation Sustainment Architecture
- Active Technical Exchanges Between CLOE Technical Team and Aviation PMs
- Agreement With Aviation PEO and PMs to Map The Consensus Aviation Architecture Into The CLOE OA

\*PS-MRS – Platform-Soldier Mission Readiness System;

\*\* LDSS - Logistics Decision Support System

# CLOE & Other Major Program Timelines

Sustaining The Transforming Army... Transforming the Sustaining Army

## *Addressing G-4 Concerns*

# Addressing G-4 Concerns

- **No Single Agency Is Responsible/Nobody Has Been Told NO**
  - Three CLOE GOSCs and Policy Memo Establish CLOE As a Requirement With G-4 Lead
  - ORDs and Policy Have Already Been Published
  - Governance / Enforcement an Issue
  - PMs and Staff Have Rallied to CLOE Without Enforcement Mechanism in Place
- **CLOE Aspires to Work With MTS and FBCB2, but These Systems Are Point Solutions**
  - CLOE Ground Rule-work With What Is Available Today (FBCB2, MTS).
  - Spiral Development for What Is Available Tomorrow (JTRS, WIN-T)
  - CLOE Modular Architecture Allows Plug and Play
- **CLOE Should Wait for Enablers Like WIN-T**
  - WIN-T Not Available Until 2012 - Need to Develop Infrastructure Now
  - Waiting for WIN-T to Mod Platforms Delays “Fix the Current Force” and “Connect the Logistician”
  - CLOE Is Working to Engage Full Range of Platforms and Systems by Spring 2004.

# *CLOE Implementation Strategy*

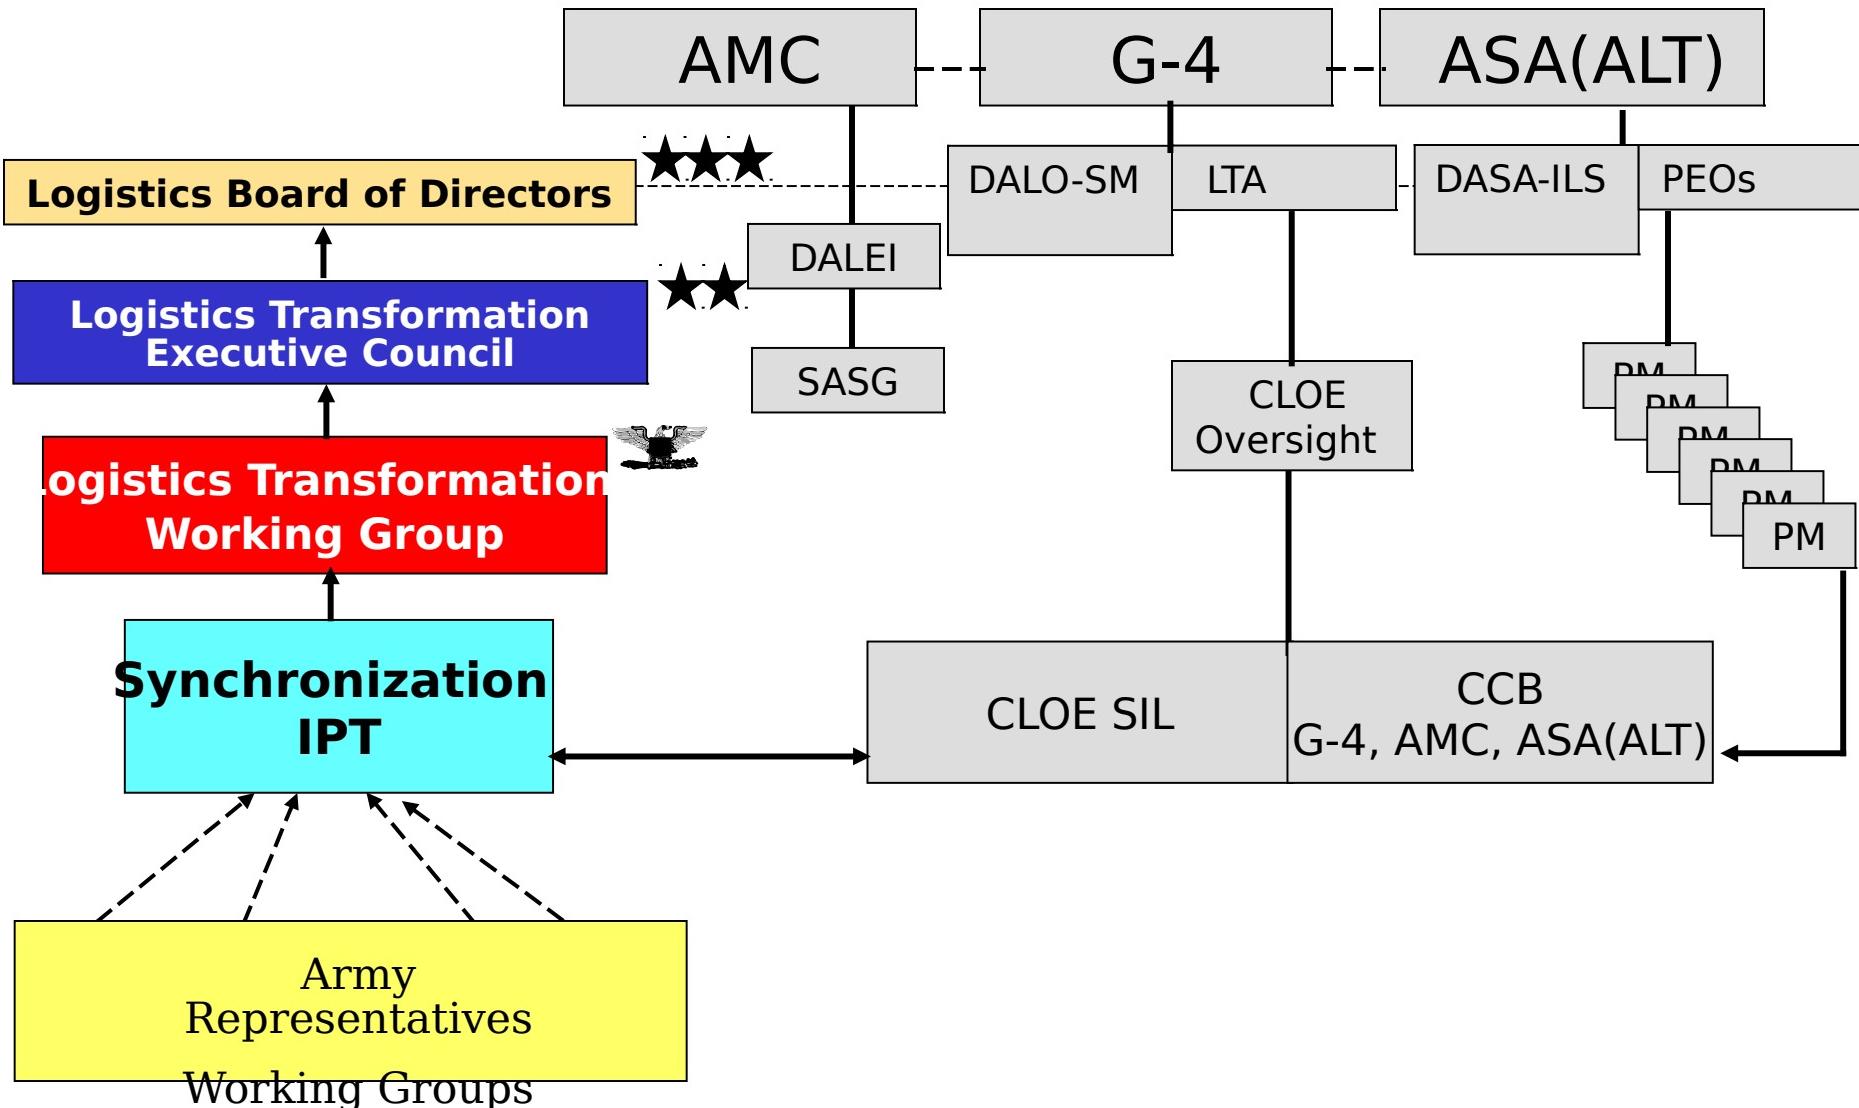

# *Implementation Strategy*

- **Establish CLOE As an Official G-4 Program Within LTA AR 10-25**
- **Obtain Agreement With MILDEP ASA(ALT)**
  - Accept CLOE Governance Structure
  - Support Funding in EE PEG
  - MOAs With PEOs
- **Approve CLOE Funding Strategy**
- **CLOE Master Plan Signed by CSA/VCSA**
- **Establish SIL and CCB**

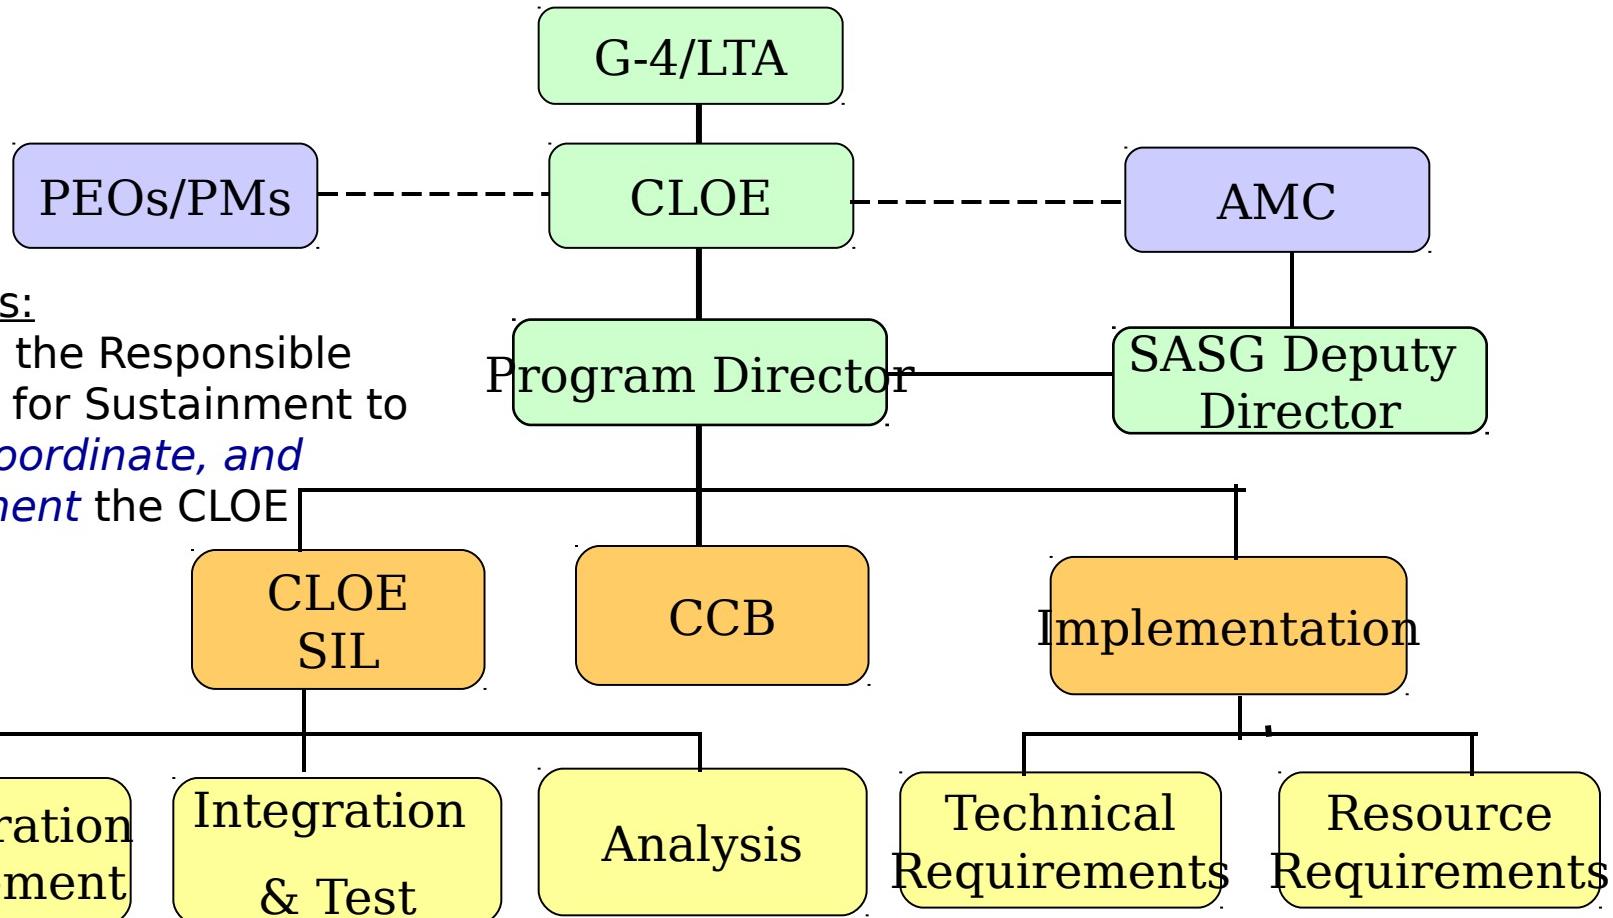

# Proposed CLOE Governance

# CLOE Organizational Concept

Policy states:

G-4, as the Responsible Official for Sustainment to *lead, coordinate, and implement* the CLOE

LTA has been assigned as the Executive Agent for CLOE

# *Enforcement Mechanisms*

- **Incorporate CLOE Requirements Into System Strategy:**
  - Concept Requirements Documents (CRDs)
  - Acquisition Strategy
  - Test & Evaluation Master Plan
- **Formalize ASA(ALT) Policy Memo in Appropriate ARs**
- **Establish Tri-Chair Configuration Control Board (CCB)**
  - DCS, G-4
  - AMC
  - ASA(ALT)
- **CLOE Funding Oversight Through EE PEG and SS PEG**
- **Provide Guidance to PMs Via Approved Technical Integration Plan (TIP)**

## RECOMMENDATIONS

- **G-4 Approve the CLOE Implementation Strategy**
- **G-4 Host Briefing to MILDEP ASA(ALT)**
